## Experiential Learning and Adventure: Language Immersion in Spain

Based in La Herradura, a small fishing village one hour south of Granada and 50 minutes east of Málaga, our language immersion program brings students to the intersection of tradition and modernity. The foothills of the Sierra and the sweeping blue of the Mediterranean are our classrooms, and all teaching is done in the safety and context of village life and nearby activities. Our programs are open to teenagers between **14 and 18** traveling with or without a teacher.

Our team of professional guides and teachers bring language and culture to life. At Centro de Idiomas El Mar we believe that immersion is not just a classroom activity... Live with a family that has called La Herradura home for generations, trek down ancient routes used by the Moorish conquerors, dive into our Marine Biology lab. Practice new vocabulary as you make Paella or explore the depths of La Alhambra. Meet local students and form friendships that span across the world.

*This is immersion. This is Centro de Idiomas El Mar.*
